

## Instruction Manual

**Congratulations on acquiring your VaultKi, the first physical blockchain designed for safety!**

To ensure the proper use of your VaultKi, please read the following carefully:

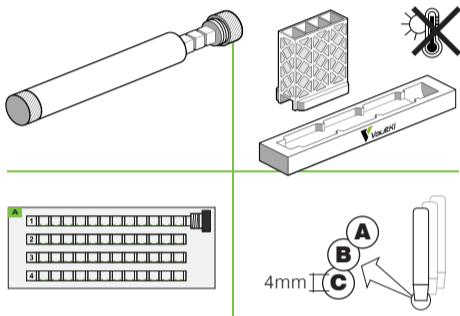

1. We recommend the use of the **letter punch set provided by VaultKi**. Only letter punches of the exact same size would fit in your letter punch holder.
2. You will only stamp the **first 4 letters** of each word. These are all you need to accurately recover your seed phrase. No two words from the seed phrase wordlist (BIP39 standard) share the same first 4 letters.
3. Carefully write down the first 4 letters of each word on **the template** pages A & B as detailed in Step 1.
4. Before permanently stamping any letter, ensure the **letter on the punch is oriented in the correct reading direction**.
5. The **full BIP39 wordlist** is available on our website.

### Disclaimer:

In no case shall VaultKi, its directors, employees, contractors, or suppliers be liable for any injury, harm, damages, loss, or any direct, indirect, incidental, punitive, special, or consequential damages of any kind related to the purchase and use of its products.

VaultKi may provide you with or recommend you third-party tools, such as letter punches, that it neither monitors nor has any control or input on. Such tools are provided "as is" without any warranties, representations or conditions of any kind. VaultKi disclaims any liability whatsoever relating to the purchase and use of those third-party tools.

### Warning:

- Keep products away from children.
- Operate carefully during the stamping process to avoid harming yourself or others and to prevent damage to any furniture or support you may be using.
- Avoid storing your stamping stand kit in a high-temperature environment, and keep it away from direct sunlight and fire.

VaultKi's products may not be reproduced, duplicated, copied, sold, or resold without express written permission from the company.

The design of VaultKi is patent pending.
